## Recorder's Report – Yara Fall Classic

1. The format of this competition changed considerably from the traditional meet. Computerized applications were not made available in a timely manner and I was not able to check out SSC's app prior to the competition.
2. The Canada Winter Games final distance was run as a "Super" final as per the CWG definition, and not the "Super" that I was accustomed to. As directed, placings in the primary final were used to determine points, not times skated by all skaters in the super, regardless of final.
3. Lap results for the Fundamentals group and the Learn-2-Train group were entered, and posted, incorrectly. The timer results were on a sheet with the skater numbers and I took this to be the proper relationship between skater and times. Actually, the timers normally have a blank sheet and the place judge's sheet is used to match times to skater. The error was caught after completion of the meet but have been corrected in this protocol.
4. The technical package identified that seeding was to occur using the diagonal method. I was unable to find a definition of diagonal seeding prior to the start of the competition. Most lap races were seeded simply by putting the fastest skaters together (Fundamental and Learn-2-Train).
5. As per the technical package, the 3000 metre points race was seeded based upon points accumulated to that point in the competition. However, I had earlier indicated that the 3000 metre would be seeded based upon points accumulated to the end of Saturday. However, we were able to enter and calculate the results for the 1 lap pursuit in time to include it in the seeding for the 3000 metre. This meant inconsistent information going to the coaches. Sorry!
6. The 10 minute – 2 person relay results were not used to add points to individual standings. The technical package indicated to refer to appendix C for how to assign points but there was nothing in appendix C.
7. Also within the 10 minute – 2 person relay, the order that the skaters cross the line on their final lap needs to be recorded. This was not done as it was not known, at the time, to be important. As two teams completed the same number of laps, the order of crossing the finish line is used to break the tie. Oh well, I guess we will know for next time.
8. For the Fundamental and Learn-to-Train groupings, the laps races were not reseeded between the first run of the distance and the second run of the distance. There wasn't enough time for the office to perform this function. Fortunately, the placing of the skater was not important, only the times.
9. The Train-to-train division was not run as division 1, 2 and 3. We don't have enough skaters for fair and enjoyable skating in such tight age classes. Therefore, all T-2-T skaters were seeded into two groups based upon submitted seed times. Once into groups, the groups distances were run as per past all-points format. I did not have time to figure out what was documented in the technical package, and then modify code accordingly.
10. The Learn-2-Train teams for the skills competitions were re-jigged to accommodate no-shows. This was acceptable for the barrel racing as that was a collaborative event. However, this re-jigging resulted in team members skating against each other in the chuck racing, a contributive event. We simply assigned points as they were earned and did not freak out any further.
